RE: Site Management Activity Completed, Pike Industries, Berlin, Vermont  
(site #91-1066)

Dear Mr. Fraser:

The Vermont Department of Environmental Conservation, Sites Management Section (SMS) has received and reviewed the March 10 and May 13, 1999 Heindel and Noyes, Inc. (H&N) reports concerning the above referenced site. Based on a review of the file, the current conditions at this site and the results of the H&N reports, the SMS has determined that this site meets the Waste Management Division's Sites Management Activities Complete (SMAC) policy.

This means that the SMS has determined the following:

- ☐ the source of the potential contamination at this site has been adequately characterized and closed (the floor drains);
- ☐ low levels of volatile organic compounds, all below Vermont Groundwater Enforcement Standards, were found in groundwater directly down gradient of the outfall of the floor drains;
- ☐ the site does not pose an unreasonable risk to human health or the environment.

Based on these findings, the site has been assigned a Site Management Activities Completed (SMAC) designation. Sites which the Waste Management Division has determined require no further management are classified as SMAC. This designation does not release Pike Industries from any past or future liability which may arise from the contamination which originated from the floor drains at this site. It does mean that the SMS is not requiring any additional work be performed at this site in response to the 1996 release. If any additional information comes to light

in the future, then the SMS may reconsider this determination.

If you have any questions concerning this matter, please feel free to contact Richard Spiese or me at (802) 241-3888.

Sincerely,

A handwritten signature in dark ink, appearing to read "Desch", is written over a diagonal line that extends from the bottom left towards the center.

George Desch, P.E., Chief  
Sites Management Section
